
How to find narrowcast programs that have moved to the B3 satellite

Background

As you may be aware, since December 2003 the narrowcast programs that were once available along with all the other Australian Free to Air programming for television and radio, moved from Optus satellite C1 to satellite B3.

Programs affected by this change

TV Narrowcast

Channel	Station	Program
50	TRT	Turkish
51	TBN	Trinity (Religious)
52	Da Aitv	Chinese/Mandarin
53	Abu Dhabi	Arabic Language
54	Ad Hoc	Itinerant
56	Mac TV	Chinese
74	BVN	Dutch

Radio Narrowcast

Channel	Station	Program
R64	RAWFM	Modern Dance & more
R65	TRT FM	Turkey Entertainment
R66	VOT	Voice of Turkey
R67	ABS Radio	Live Arabic and Australian Radio
R68	Tamil	Tamil music and programming
R70	Kossuth	Hungarian Language
R71	RNW3	Dutch and Flemish
R72	Emirates	Arabic Language
R73	RNW1	Dutch and Flemish
R74	RNW2	Dutch and Flemish

Finding B3

The B3 satellite is located at 152 degrees longitude. It's not very far away from the C1 satellite, which is located at 156 degrees longitude.

To find the B3 satellite, if you are already set up on C1, simply move the dish approximately 10 degrees west and elevate 1 degree.

If you need further assistance, the friendly staff at Videosat are always available to help you.
